A; Note: the authors translated the codon ACC for residue 206 as Ala and TAT for residue A; Note: the authors did not translate the sequence for the signal peptide
A; Note: expression of opacity proteins is regulated by the number of translated repeat of repeats place the start codon in frame with the rest of the protein

A;Note: the nucleotide sequence was submitted to the EMBL Data Library, November 1991
A;Note: only a part of the translation is shown
A;Note: expression of opacity proteins is regulated by the number of translated repeated to the start codon in frame with the rest of the protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              N;Alternate names: outer membrane protein class 5
C;Species: Neisserla meningitidis
A;Variety: strain FAM18

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                A;Cross-references: EMBL:U13708; NID:g535357; PIDN:AAA74082.1; PID:g535358
A;Experimental source: isolate 150636
A;Note: the nucleotide sequence was submitted to the EMBL Data Library, August 1994
A;Note: expression of opacity proteins is regulated by the number of translated repeat
A;Note: expression of opacity proteins is regulated by the number of translated repeat
Of repeats place the start codon in frame with the rest of the protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          F;99-107/Domain: transmembrane *status predicted <TM3>
